

# it.services

## The challenge:

Just like the phrase „worry-free IT”, Integrated Systems AG has developed the right type of IT environment, whereby our software products can be easily integrated into your organization.

Working together, we will determine which of our IT solutions are most appropriate for your organization’s needs and future goals.

Security, reliability, availability, performance, and maintainability are vital to any IT department with a custom-fit IT infrastructure. We take care of your in-house, ASP, SaaS, or cloud solution so that you can concentrate on utilizing the software.

## What we offer:

- Virtualization of the IT environment
- Linux and Windows operating systems
- Terminal server solutions
- Databases / Database service
- Interfaces / Web-services
- Data backup concepts
- Multi-stage security concepts (firewall, virus protection solutions)
- Site networking / encrypted maintenance connections (VPN)
- Monitoring / supervision of IT services and software which are critical to business
